

Delamode Group: Environmental Policy Statement

At Delamode Group, we are acutely aware of our environmental obligations. Recognising the significant impact that the freight forwarding and warehousing logistics industry has on global CO2 emissions, we are dedicated to perpetually enhancing our environmental protection across all facets of our operations. Our ethos is rooted in fostering a culture of positive environmental engagement and assuming a proactive role in diminishing the carbon footprint associated with our freight management and warehousing solutions.

We acknowledge the critical importance of environmental conservation and the imperative of climate change mitigation. As a leading entity within the group freight sector, Delamode Group is steadfast in our commitment to advancing initiatives that support the global environmental agenda.

Our ambition is to cultivate an eco-friendly freight forwarding and logistics framework that not only aligns with but also surpasses the expectations and standards of our clients, suppliers and partners. Environmental protection serves as a foundational element in the Group's business strategy, emphasising the long-term development of environmental performance and the ongoing assessment of this performance.

Delamode Group is proactive in implementing strategies to either avert or minimise environmental degradation and to responsibly manage any unavoidable impacts. We pledge to comply with the environmental legislations of each country in which we operate and to champion the cause of global environmental sustainability.

Addressing our environmental footprint involves a concerted focus on reducing fuel consumption, mitigating road traffic, responsible waste management, and optimising energy efficiency.

Our commitment is to:

- Adhere to all local environmental laws and regulations pertinent to our operations.
- Decrease transportation distances through improved logistical efficiencies, backloading strategies, and by prioritising the most eco-friendly transportation options and equipment available.
- Continually monitor and enhance our environmental performance to prevent pollution.
- Set a precedent in reducing our energy and fuel consumption, and minimising our landfill waste.
- Favor equipment and vehicles that are designed to lower carbon emissions.
- Ensure comprehensive communication of our environmental policies and standards to all employees and stakeholders, including our suppliers.

Delamode Group will regularly evaluate our environmental performance, establishing action plans in collaboration with our senior management when necessary. We encourage our employees to adopt environmentally responsible practices in their daily tasks.

Open and active dialogue about environmental matters, legislative updates, and new advancements is vigorously promoted within the Group, fostering a collaborative approach to environmental responsibility among all stakeholders and employees.

Justas Veršnickas

CEO of Delamode Group
